

**NEW!**

## Introducing our **Xtreme Life™** Spiral Bits

Experience superior performance and tool life with our new, **proprietary carbide grade** mortise compression and spiral bits. Currently available in popular select sizes, our **Xtreme Life™** bits outperform their “coated” counterparts in more ways than one! Coated bits lose their “edge” once they are sharpened....our **Xtreme Life™** bits retain their superior performance through multiple regrinds until they are ready to be retired!

**Xtreme Life™** bits are ideal for extremely abrasive materials (white melamine, black melamine) that often challenge standard grade tools.
