## Xtreme Life™ Solid Carbide Bits

Experience superior performance and tool life with our **proprietary carbide grade**, mortise compression and spiral bits. Our Xtreme Life™ bits outperform their “coated” counterparts in more ways than one! Coated bits lose their “edge” once they are sharpened—our Xtreme Life™ bits retain their superior performance through multiple regrinds until they are ready to be retired!

Xtreme Life™ bits are ideal for extremely abrasive materials (white melamine, black melamine) that often challenge standard grade tools.

### 2-Flute Compression Bit
